

You've got CLASS

PROFESSORS SAY ...

Why you should take this course.

"Everyone believes they think logically, but most of us don't know that much of our reasoning is, in fact, faulty and illogical. This fact is also often true of political commentators, news broadcasters, teachers and other supposed authorities. You can learn to be more logical and persuasive in your own thinking and simultaneously protect yourself from supposed authorities who are sometimes nothing more than sophists and propagandists. A course in logic is a course in mental self-improvement and self-defense.
