

# Prepare to Work: Computer and Information Technology

Prepare quickly for a new career.

## Network Administrator

This program will provide you with an in-depth understanding of the theory, hardware and software of computer networking. It provides complete introductory training that is new to networking. If you have networking experience, you will learn more advanced networking concepts. Training received from this program will prepare you to sit for the industry standard vendor-neutral certification Network+. Network+ proves that you have met industry competencies in troubleshooting, installing and configuring basic networking infrastructure.

This open-entry/open-exit class meets year round. Participants have up to one year to complete the program.

Required WorkKeys assessments will be provided at beginning of program.

**Prerequisites:** At least two years working hands-on with computers. A+ Certification is preferred but not mandatory.

### Flexible starting dates

Monday to Friday  
M-TEC 201  
Cost: \$4,800  
Includes Network+ Certification test voucher.  
ZPIT 402 01

Port Huron campus  
80 CEUs/800 Contact hours

**For more information, call:  
(810) 989-5788**

## Convergence Technology

Convergence Technology is the convergence of data, voice, video and wireless services into a single network. The demand for unified communications solutions that are feature-rich and cost-effective continues to grow at a rapid pace. Installing and maintaining these solutions requires a well-trained workforce that understands how the technologies integrate and how to best meet customers' needs. This class will prepare you to sit for two vendor-neutral certification exams. The CCNT (Certified in Convergent Network Technologies) and the CTP (Convergence Technologies Professional). Both are highly regarded and a must in the telecommunication industry.

This is an open-entry/open-exit class that meets year round. Participants have up to one year to complete the program.

Required WorkKeys assessments will be provided at beginning of program.

**Prerequisite:** At least one year of hands-on computer experience.
